

“Chase Alloys Limited is committed to a partnership with our employees, our suppliers and our customers to sustain and improve the environment in which we all live.”

Environmental Management Policy Statement

Chase Alloys Limited continues to strive to ensure minimal impact upon the environment through its work.

We pledge:

- All non-hazardous waste that is sent to landfill will be pre-treated in-house by sorting for recycling.
- Any hazardous waste will be transferred for specialist treatment prior to landfill.
- To recycle all waste and packaging material in the products that we receive.
- To continue through our suppliers to seek to use products that are the least harmful to the environment.
- To ensure that effects on the environment will be considered above the cost wherever practicable.
- To encourage our suppliers to consider mitigating effects on the environment in their supply.
- To provide information and training to our employees on the potential damaging effects on the environment of our actions.
- To use sustainable products and energy wherever practicable and possible.
- To share our corporate responsibility with regard to environmental reporting and management systems.
- To consider the environment in all transportation, minimising journeys and using fuel efficient vehicles.
- To embed energy saving and recycle practices into our office and warehouse environments.

Chase Alloys Limited will review this policy and the practical effects of its measures and their application on an annual basis.
